

Power supply size
DESK LAMP IS PREFERRED

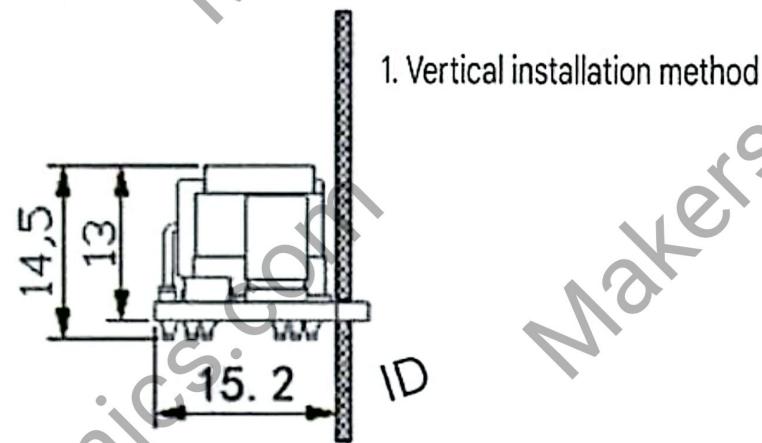

(Unit: mm/millimeter)

Schematic diagram of vertical installation method

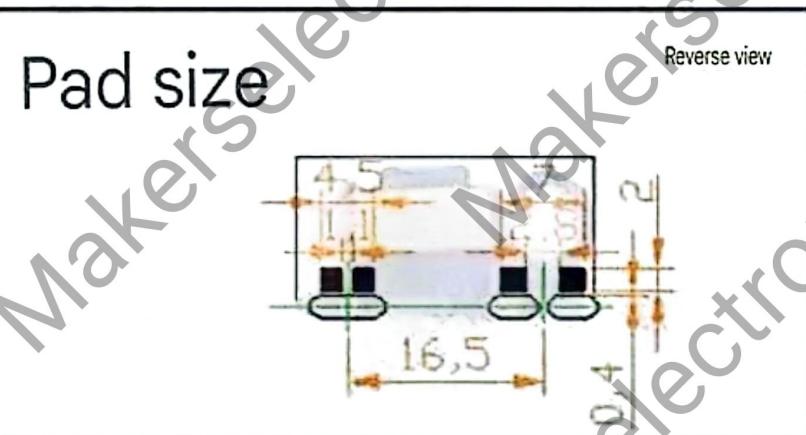

DESK LAMP IS PREFERRED

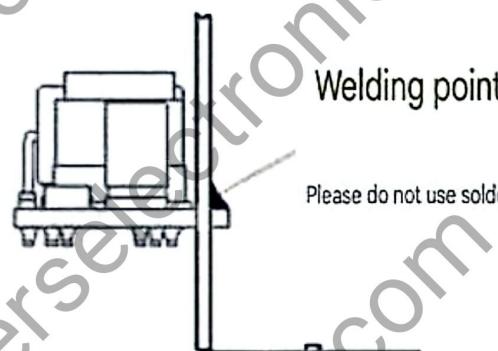

3W module has the same pinout as 5W module

Please slot the circuit board according to the dimensions in the

Try not to arrange any circuits under the power module to avoid short circuits.

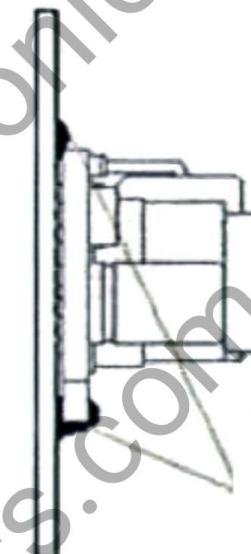

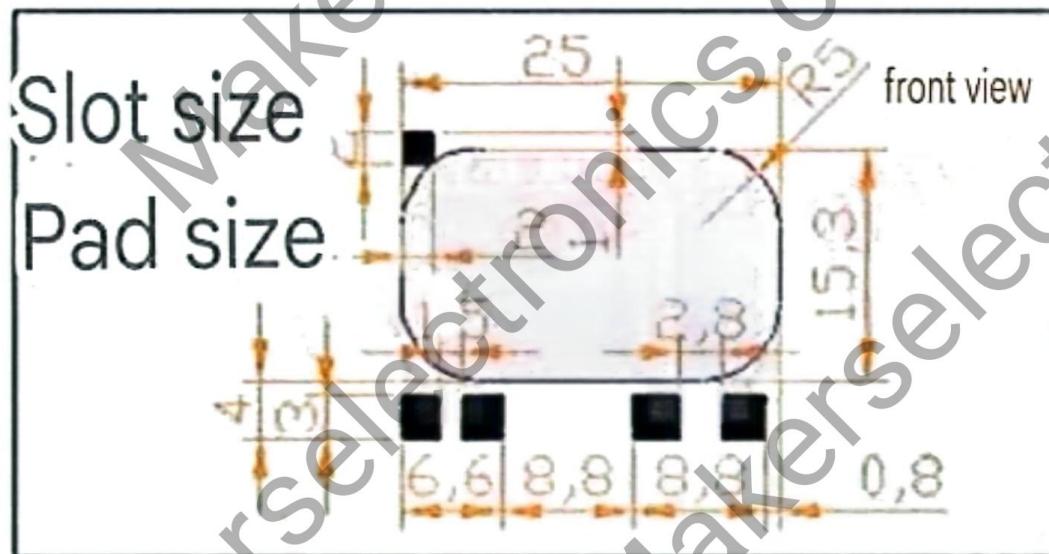

left figure. The pad is on the back of the board. To increase the

strength of the pad, the circuit should be as wide as possible.

Schematic diagram of horizontal patch installation method

DESK LAMP IS PREFERRED

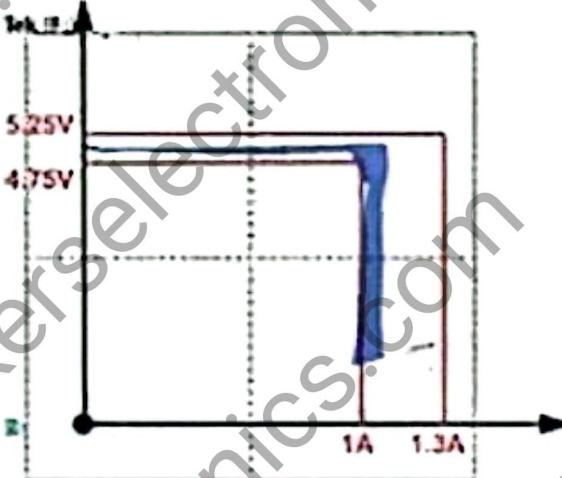

2. Horizontal patch installation method

Soldering points (not reflowable)

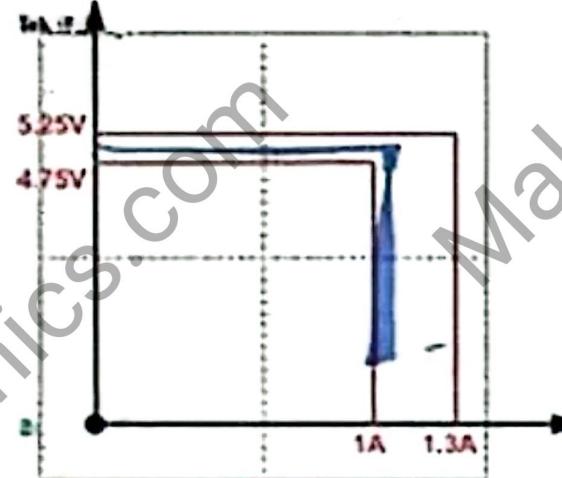

Please cut the circuit board according to the dimensions shown on the left.

Output voltage characteristics (at 5V)

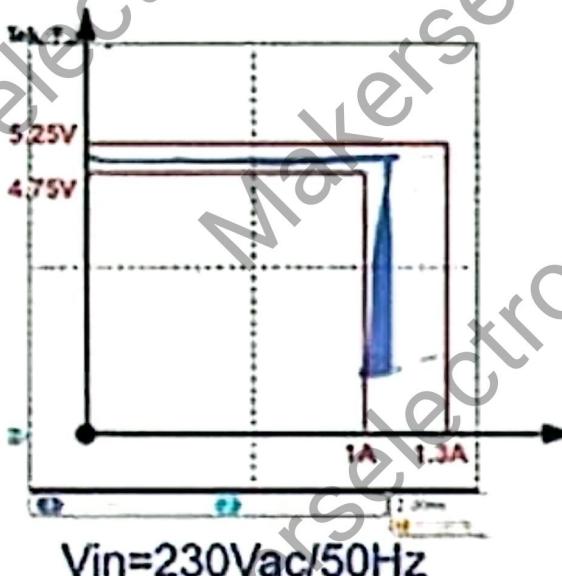

DESK LAMP IS PREFERRED

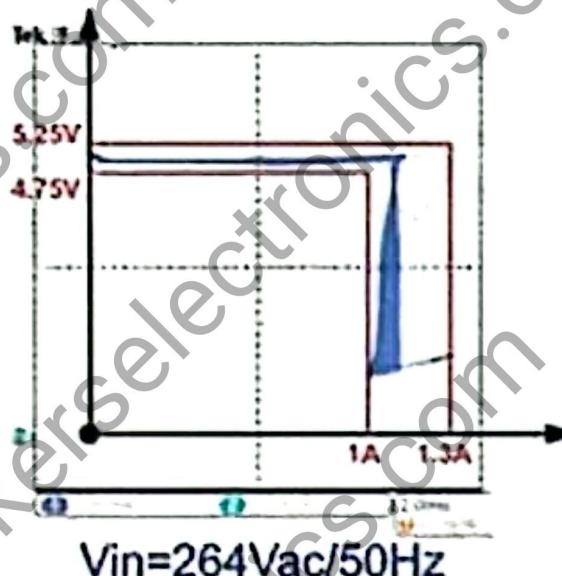

V_{in}=90Vac/60Hz

V_{in}=115Vac/60Hz

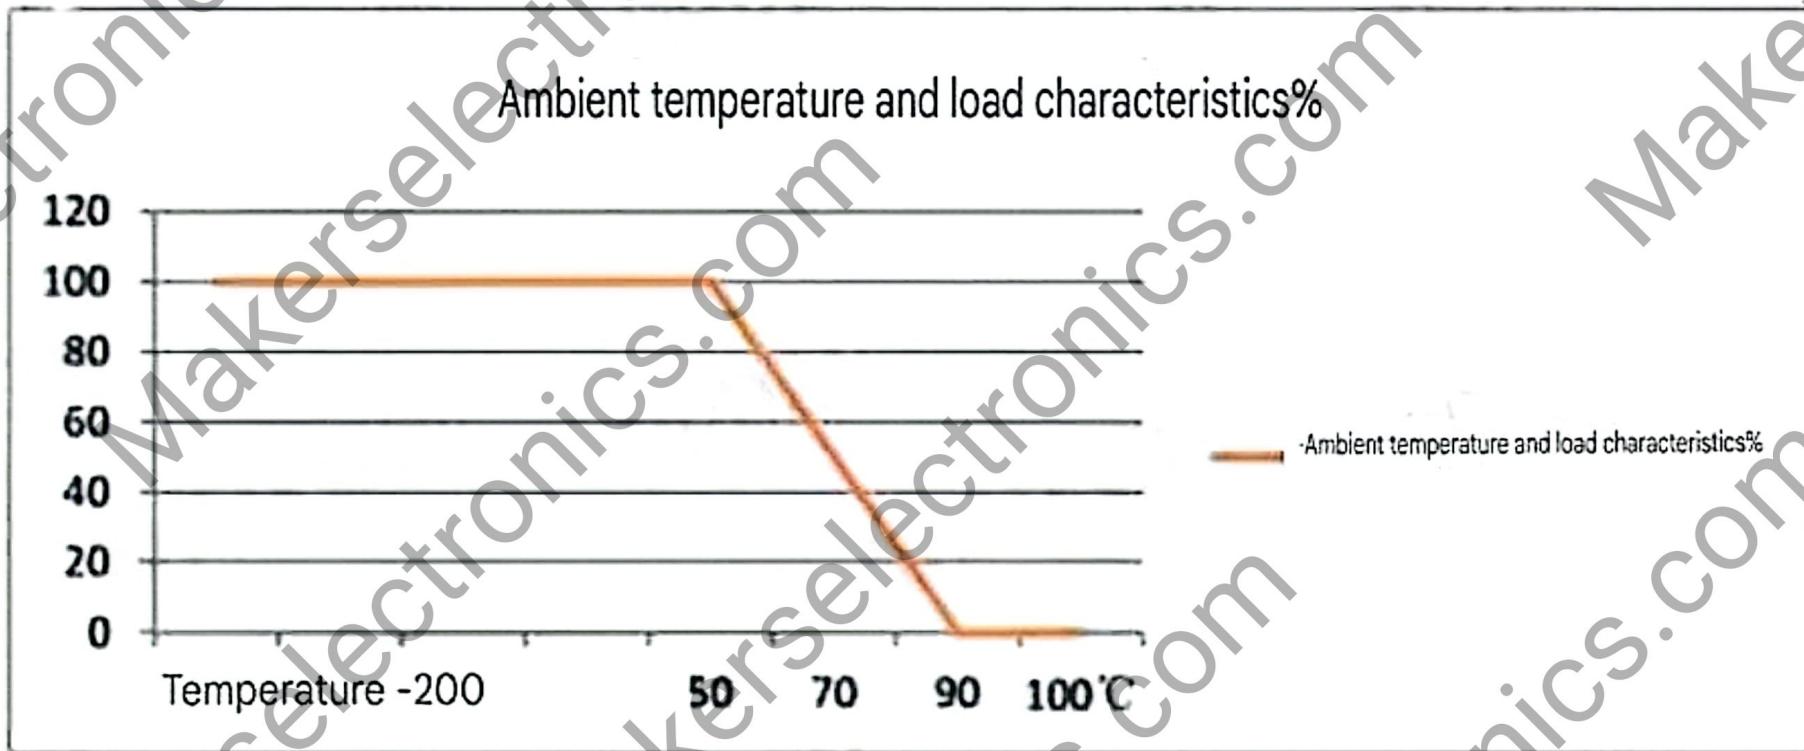

V_{in}=230Vac/50Hz

V_{in}=264Vac/50Hz

Ambient temperature and load relationship

DESK LAMP IS PREFERRED

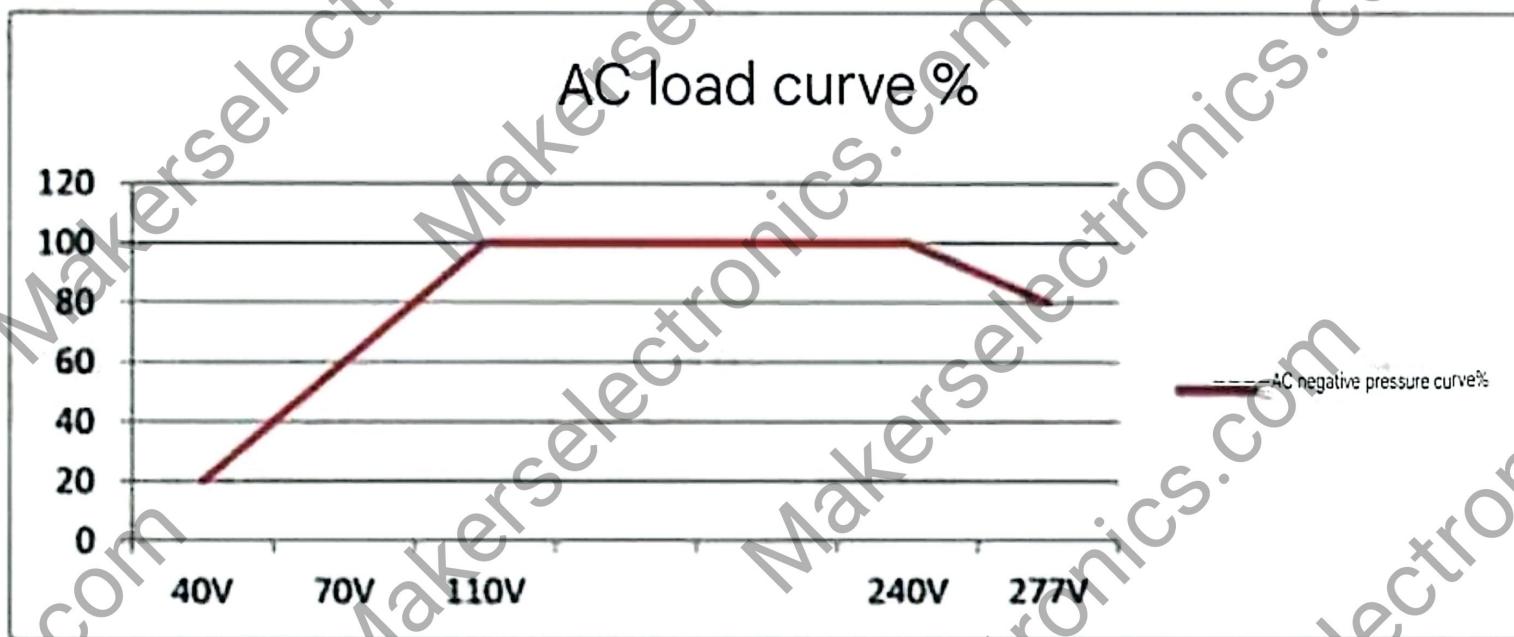

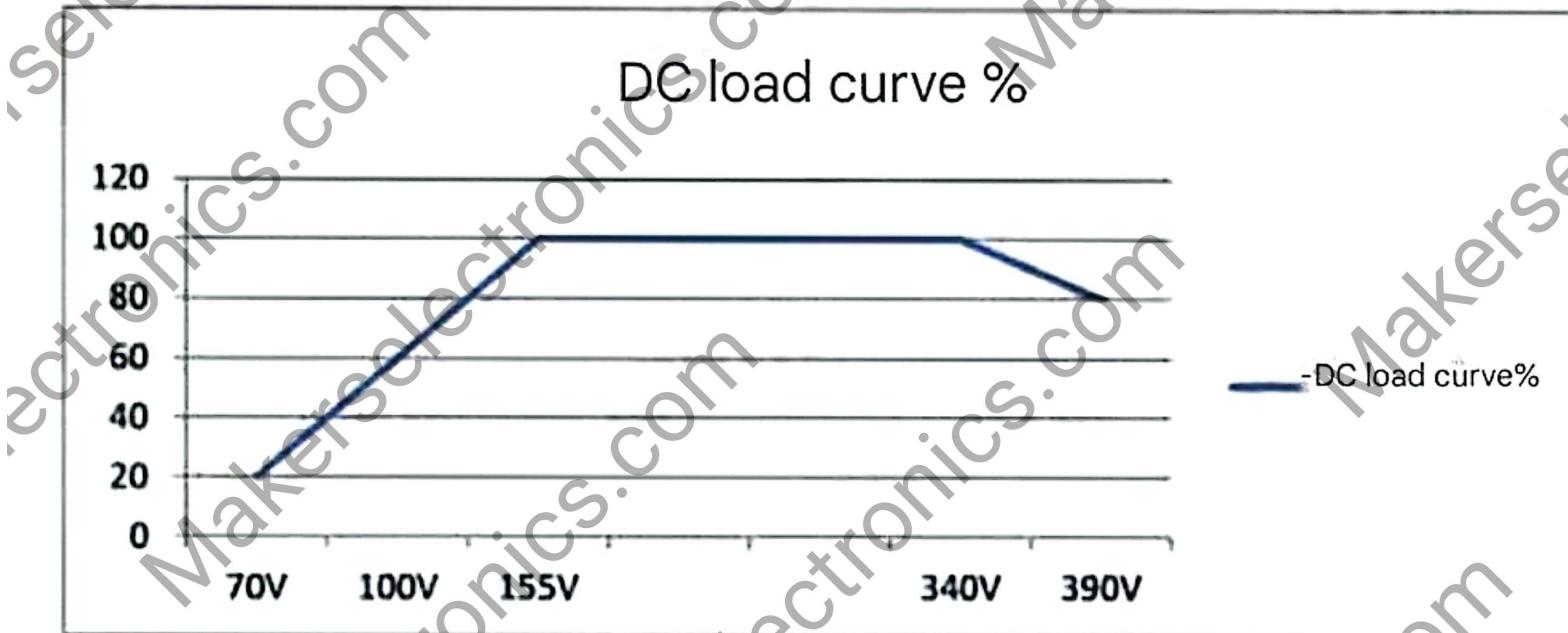

100% load current is allowed when the ambient temperature is below 50°C, 50% at 70°C. It is not available when it is above 90°C, and forced over-temperature protection is required at an operating temperature of 105°C.

When the ambient temperature is below 50°C and the load current is less than 70% of the full load, it is allowed to work continuously for 24 hours a day. The service life of the advanced model is more than 5 years, and the service life of the ordinary model is more than 1 year.

When the ambient temperature is below 50°C and the load current is less than 50% of the full load, the service life of the advanced model is more than 10 years and the service life of the ordinary model is more than 2 years if the model is used continuously for 24 hours a day. The service life of the advanced model is about 20 years if it is used intermittently.

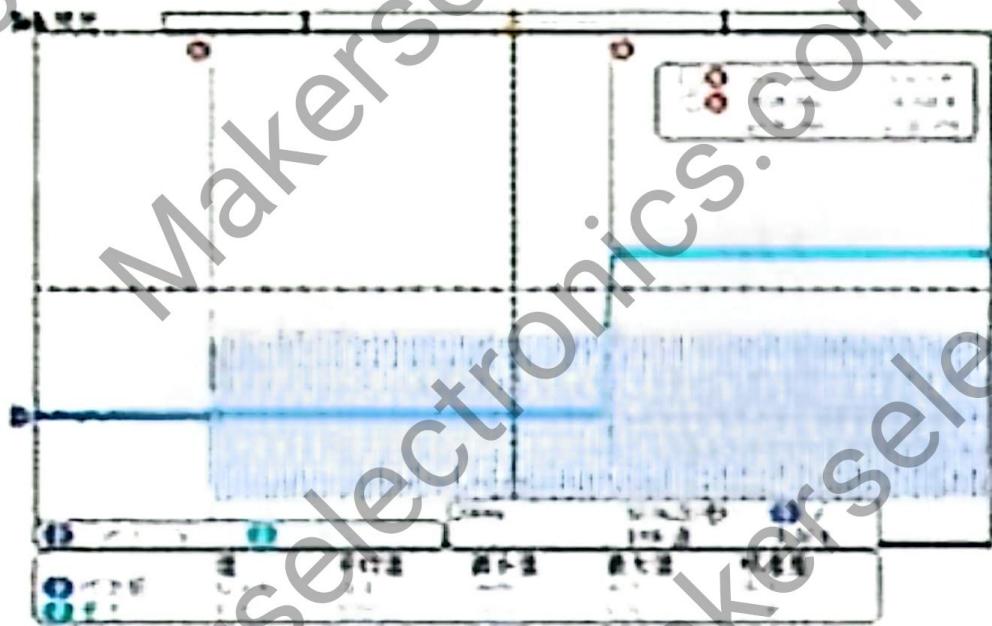

Working voltage range and load characteristics

DESK LAMP IS PREFERRED

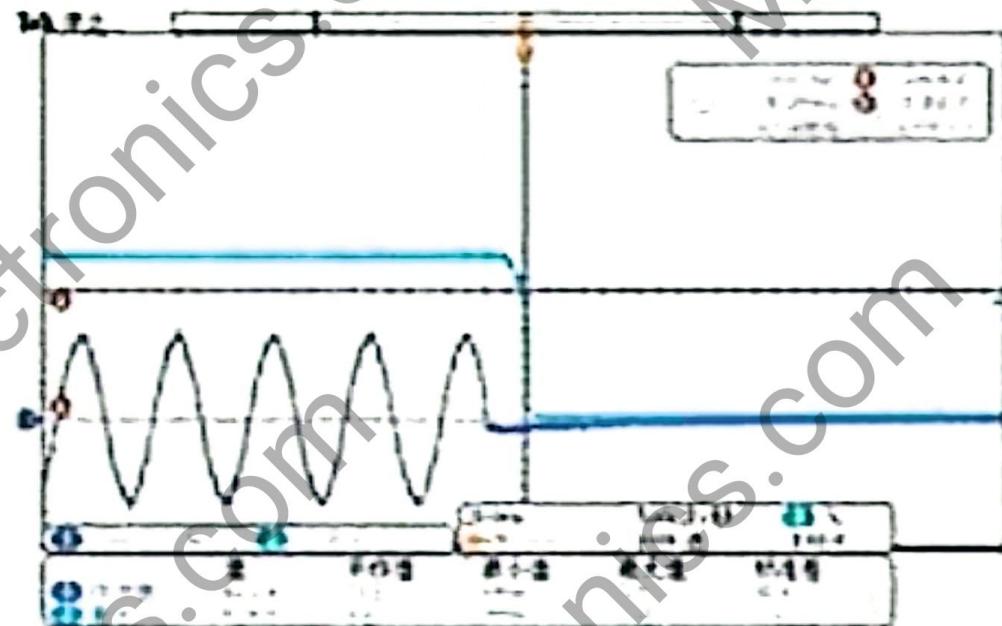

Start time

DESK LAMP IS PREFERRED

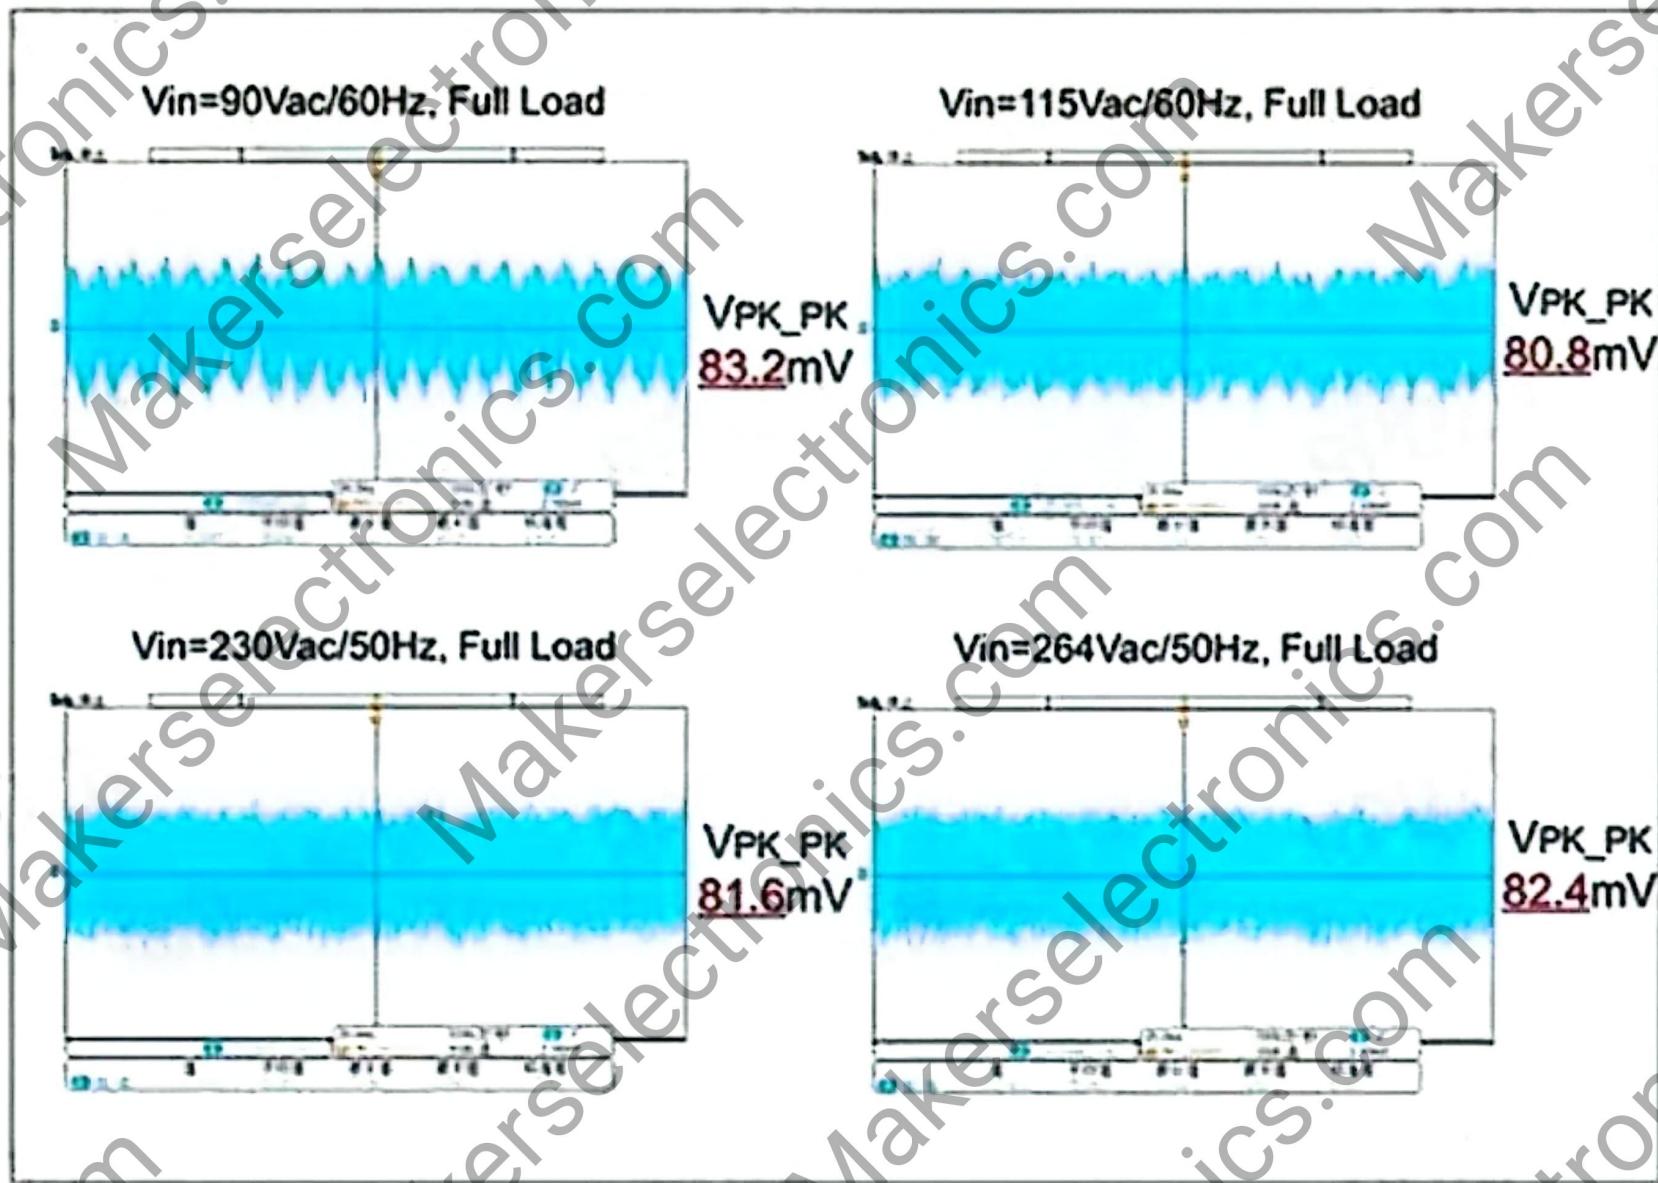

$T_{\text{Turn-on Delay}} = \underline{0.836\text{s}}$
90Vac/60Hz, Full Load

$T_{\text{Hold up}} = \underline{7.400\text{mS}}$
90Vac/60Hz, Full Load

RIPPLE AND

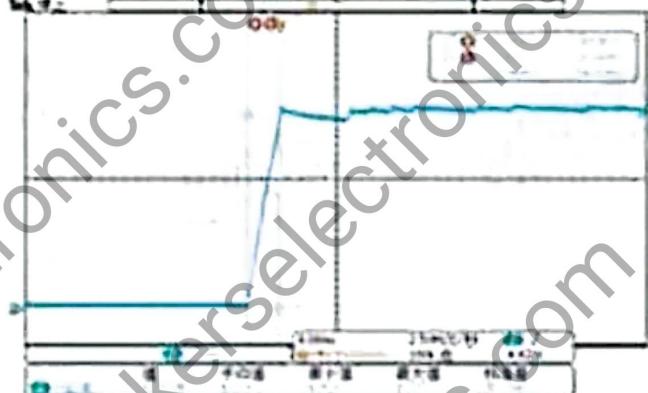

NOISE DESK LAMP IS PREFERRED

Load Regulation and Rise Time

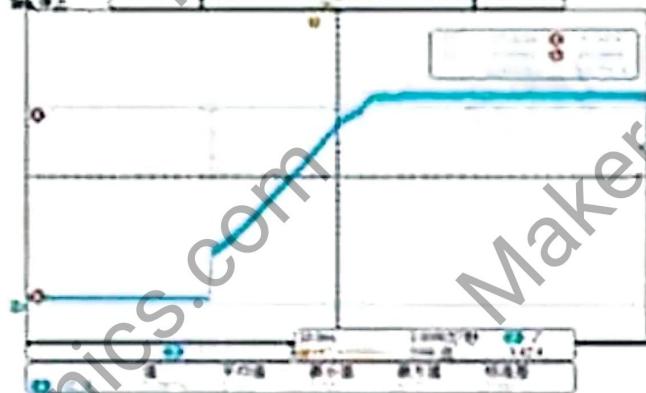

DESK LAMP IS PREFERRED

Vin=90Vac/60Hz, No Load

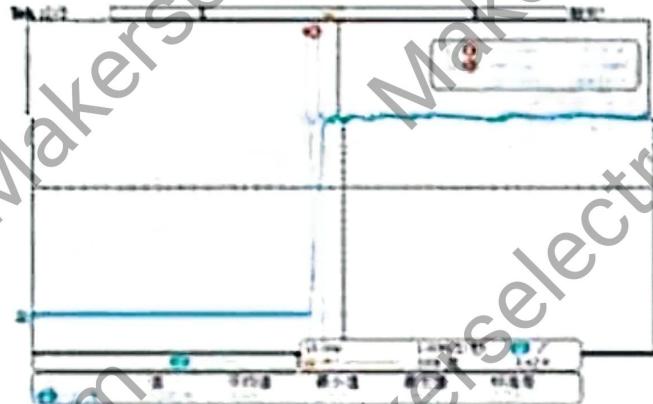

Vos = 4.237%
T_RT = 2.08mS

Vin=90Vac/60Hz, Full Load

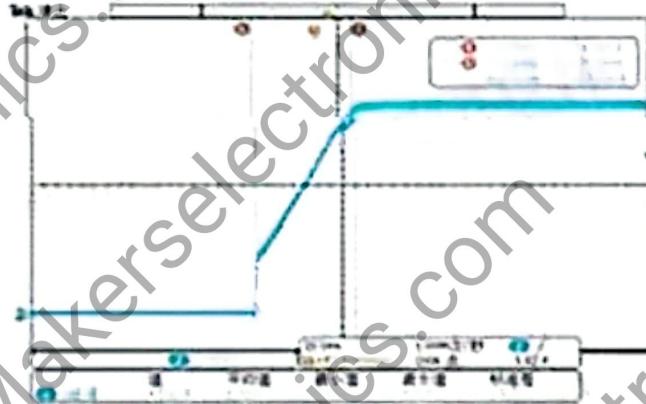

Your 5.000%
T_RT=24.7mS

Vin=264Vac/50Hz, No Load

Vos = 5.042%
T_RT = 2.00mS

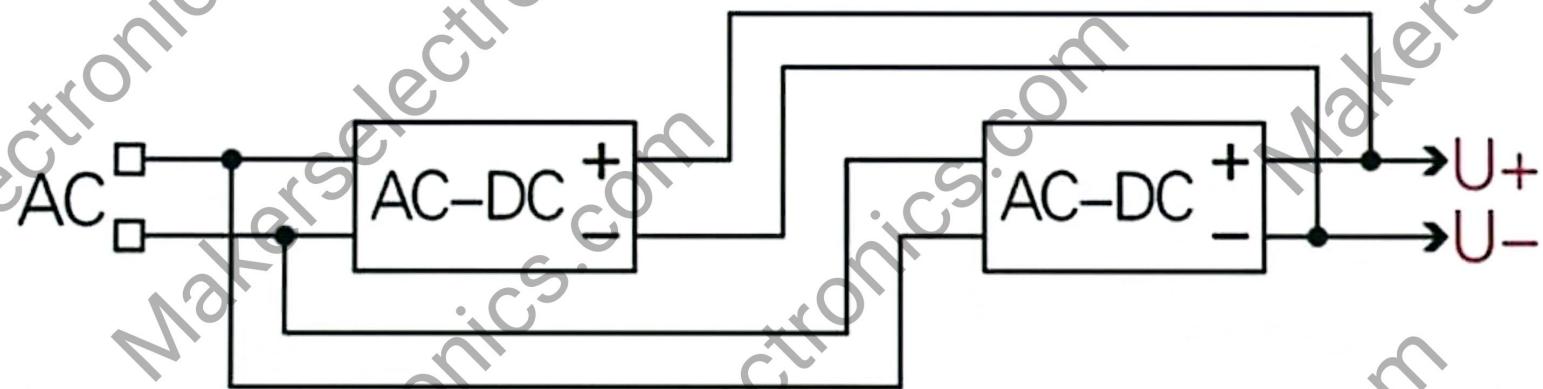

Vin=264Vac/50Hz, Full Load

Vos = 4.032%
T_RT = 16.1mS

Ruipuda module supports the following applications

Double modules in parallel

Double modules in series
