Makers Pro CHK-700 Chicken Head Potentiometer Knob for 6mm Shaft Without Screw Lock

Stock Item No: **13754/13755/13756/13757**

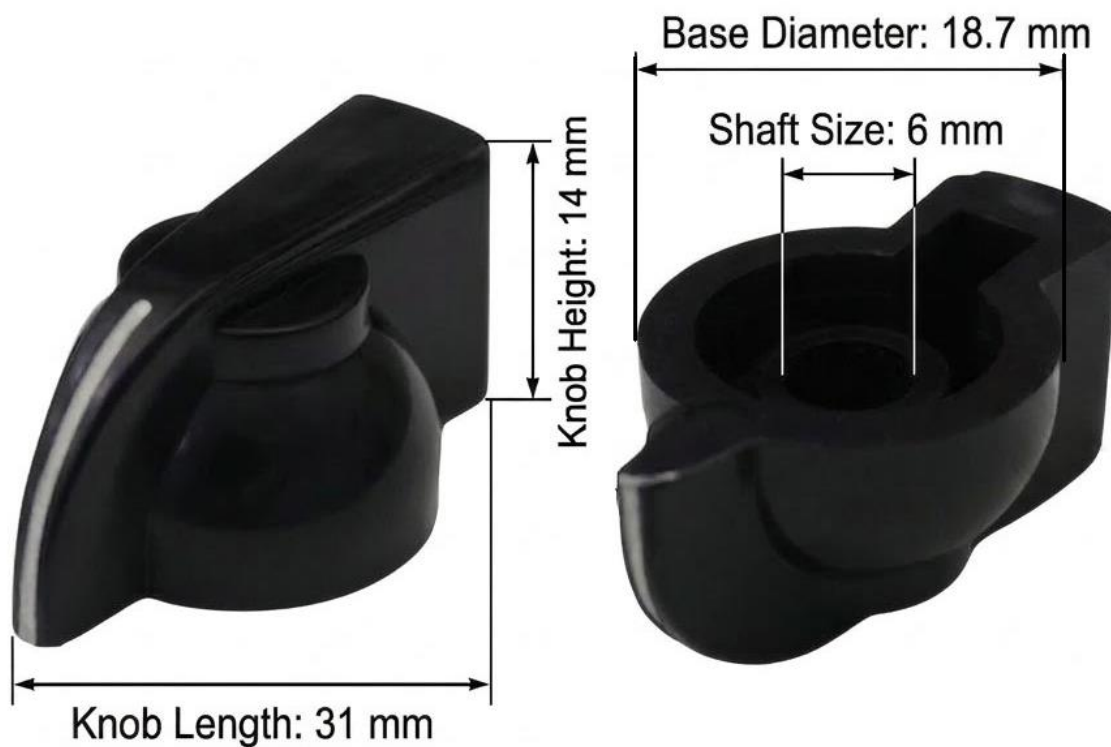

Product Details

Makers Electronics chicken head pointer knob, is made from high-grade premium plastic for long-lasting durability and reliable performance. This molded knob features a screwless push-on (friction fit) design, specifically engineered for quick, tool-free installation directly onto standard 6.0 mm diameter knurled or split potentiometer shafts. The body is equipped with a high-contrast white indicator line, ensuring accurate visual tracking of positional settings on any control panel interface.

Features and Benefits

- Molded chicken head pointer knob with a highly visible white index line
- Screwless push-on friction design for easy tool-free assembly
- Suitable for use with 6.0 mm diameter split or knurled shafts
- Provides robust electrical insulation and comfortable tactile feedback
